2019 Continuing Education for Medical Office Professionals

Advanced Coding & Auditing Boot Camp

Physician services and improper coding continue to be high profile items on the Office of the Inspector General's audit radar.

Don't wait for an audit letter to come. This class will help you get your self-audit program off the ground. Improving audit proficiency reduces practice risk and promotes accurate claim submission. Participants in this session will audit case scenarios that relate directly to trouble spots and areas of concern in medical office billing.

Class Highlights:

- Discuss the benefits of establishing an ongoing chart audit process
- Review resources and tools needed to create a successful chart audit process
- Identify key components, code linkage issues, and proper evaluation of the presenting problem
- Step-by-step review of coding procedures and '95 vs. '97 guidelines
- Guidance on selecting the level of medical decision-making
- Complete hands-on coding scenarios designed to help capture proper reimbursement under the current coding requirements
- Review E/M documentation guidelines, as well as surgical and procedural documentation requirements

To maximize the experience, participants may bring current copies of CPT[®] and ICD-10-CM coding manuals, and a medical dictionary.

Registration Form Keep a copy for your records. List additional registrants on duplicate forms.
