PMI Basics: Introduction to CPT Coding

This course provides basic level instruction in procedural coding in the outpatient setting. Medical coders must be sure the code selected matches supporting documentation and understand the guidelines that health insurance carriers expect healthcare providers to follow when billing for services rendered.

Learn Current Procedural Terminology (CPT®) coding language including terms like add-on code, fragmenting, bundling and unbundling. Participants in this class will learn to identify the main term and select the procedure or service that accurately describes what is supported by the documentation in the medical record.

Agenda:
• Learn proper use of the CPT® coding book
• Review code examples
• Hands on practice utilizing your CPT code set manual

What to Bring: Participants must bring a self-supplied and current CPT code set manual to this class.

PMI Basics: Introduction to ICD-10-CM Coding

This course provides basic-level instruction in diagnostic coding in the outpatient setting. Medical coders abstract details from healthcare provider's reports to select or validate the proper codes. Understand the coder's role and responsibilities. Learn the ICD-10-CM coding system's format and structure.

Attend this course and comprehend the importance of coding to the highest degree of specificity and paying close attention to all coding instructions.

Agenda:
• Overview of diagnostic coding and use of ICD-10-CM coding book
• Review code examples
• Hands on practice utilizing your ICD-10-CM code set manual

What to Bring: Participants must bring a self-supplied and current ICD-10-CM code set manual to this class.
